DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 12-18 and 21-26 are drawn to a pharmaceutical composition for preventing or treating sepsis or septic shock, a method for preventing or treating a mammal which suffers from or is at increased risk for developing sepsis and a method for manufacturing a pharmaceutical composition.

Group II, claim(s) 19-20 are drawn to a method for determining the severity of a septic condition and making a prognosis for the further course of the sepsis or septic shock in a mammal.

3. The claims are deemed to correspond to the species listed above in the following manner: The following claim(s) are generic: 12-26.

4. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

5. Inventions I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects. In the instant case the different product inventions are: Group I is drawn to a pharmaceutical composition for preventing

or treating sepsis or septic shock, a method for preventing or treating a mammal which suffers from or is at increased risk for developing sepsis and a method for manufacturing a pharmaceutical composition; and Group II is drawn to a method for determining the severity of a septic condition and making a prognosis for the further course of the sepsis or septic shock in a mammal. Each product has a different special technical feature, i.e., the method for determining the severity of a septic condition and making a prognosis for the further course of the sepsis or septic shock in a mammal is unlike group I. Each method comprises a different reagents and components capable of performing specific functions, whereas the other method does not require the specific components. The methods have different special technical features when compared to the other method claims. The method's special technical features are comprised within the steps of the method for determining the severity of a septic condition and making a prognosis for the further course of the sepsis or septic shock in a mammal. Accordingly, the groups lack the same technical feature.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1645

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ja-Na Hines whose telephone number is 571-272-0859. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Jeffery Siew, can be reached on 571-272-0787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
